LEGEND

□ Process step

□ Focal — eligibility & the sweep

□ Escalation target

● Entry / exit

Escalation — a Critical in round 1, or the change needs art direction, a settings change, or a new shared primitive → the full dev-loop-unity

Escalation — eligibility breaks mid-run → the general ladder, briefed with the Unity editor reference regardless

Escalation, Frame — eligibility breaks mid-run (networking, accounts, purchases, UGC, credentials) → the general ladder, briefed regardless

Escalation, Round cap — the same Critical survives a fix and recurs → blocked, stop, report; no heavier Unity loop — offer the general ladder
